OBJECTIVE

Creative Full Stack Developer and UI/UX enthusiast with a strong command of modern web technologies and AI-augmented development workflows. Known for rapid prototyping, pixel-perfect interfaces, and shipping production-ready applications with clean, maintainable code. Currently pursuing BCA while building real-world platforms that solve genuine user problems. Open to internships and entry-level roles at ambitious technology teams.

EDUCATION

Bachelor of Computer Applications (BCA)

2025 – 2028

Institute of Advanced Computer & Research, Ahmedabad

- Specialization: Computer Applications & Software Development
- Relevant coursework: Data Structures, Web Technologies, DBMS, Cloud Computing

Senior Secondary (XII) — CBSE, Commerce

2025

Airport School, Ahmedabad

- 87.00% — strong foundation in logical reasoning, mathematics, and communication

PROJECTS

MedBuddy — AI Healthcare Web Platform

April 2026

React · Python · REST APIs · HTML5 · CSS3 · JavaScript

- Architected and shipped a full-stack healthcare platform end-to-end as sole developer — frontend, backend logic, and product design.
- Core features include smart medicine reminders, symptom tracking, appointment scheduling, and a real-time symptom checker with contextual health resource suggestions.
- Designed an accessible, mobile-first UI, focusing on usability for non-technical users.
- Integrated AI-powered assistance for personalised health guidance, leveraging advanced prompt engineering for contextual, accurate responses.

3D Interactive Portfolio Website

May 2026

HTML5 · CSS3 · JavaScript · CSS 3D Transforms · GitHub Pages

- Built an immersive personal portfolio featuring CSS 3D transforms, scroll-triggered animations, and parallax effects without any canvas libraries.
- Implemented a version-controlled deployment pipeline via GitHub Pages with automated releases.
- Showcases projects, skills, and personal brand with a distinctive UI designed from scratch.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Design, CSS Animations & 3D Transforms

Backend & Tools: Python, REST APIs, Git, GitHub, GitHub Pages, WordPress, MySQL, VS Code, Figma (basic)

AI & Creative: Expert-level AI Prompting (Claude, GPT-4, Gemini), Vibe Coding, UI/UX Design, Visual Hierarchy & Color Theory, Creative Graphic Design

Concepts: OOP, MVC Architecture, Agile Development, Version Control, Cross-browser Compatibility, Performance Optimisation

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Actively pursuing web development certifications across major online learning platforms.
- Continuous project-based learning — applying new frameworks and tools through real-world side projects.
- Engaged contributor in open-source communities and developer forums (GitHub, Stack Overflow).
- Regular practitioner of AI-assisted development — prompting, evaluating, and integrating LLM outputs into production workflows.

Open to internships, collaborations, and entry-level Full Stack / Frontend / UI-UX roles
